Dear Sir/Madam

## **THAILAND L20/50 EIA APPROVAL RECEIVED 2D SEISMIC COMMENCED**

Sun Resources NL ("Sun") is pleased to report that it has been advised by Carnarvon Petroleum Limited, as operator of L20/50, that the Environmental Impact Assessment has been approved by the Office of National Environmental Protection Thailand in respect of Block L20/50.

Acquisition of 500km of 2D seismic data is now underway and is due to be completed by the end of August 2009. Refer attached plan. Several leads have been mapped on existing seismic, 4 of which Sun believes may contain >50 million barrels of oil in place. The current seismic program will be aimed at better defining these existing leads, and identifying new leads and prospects for drilling in 2010.

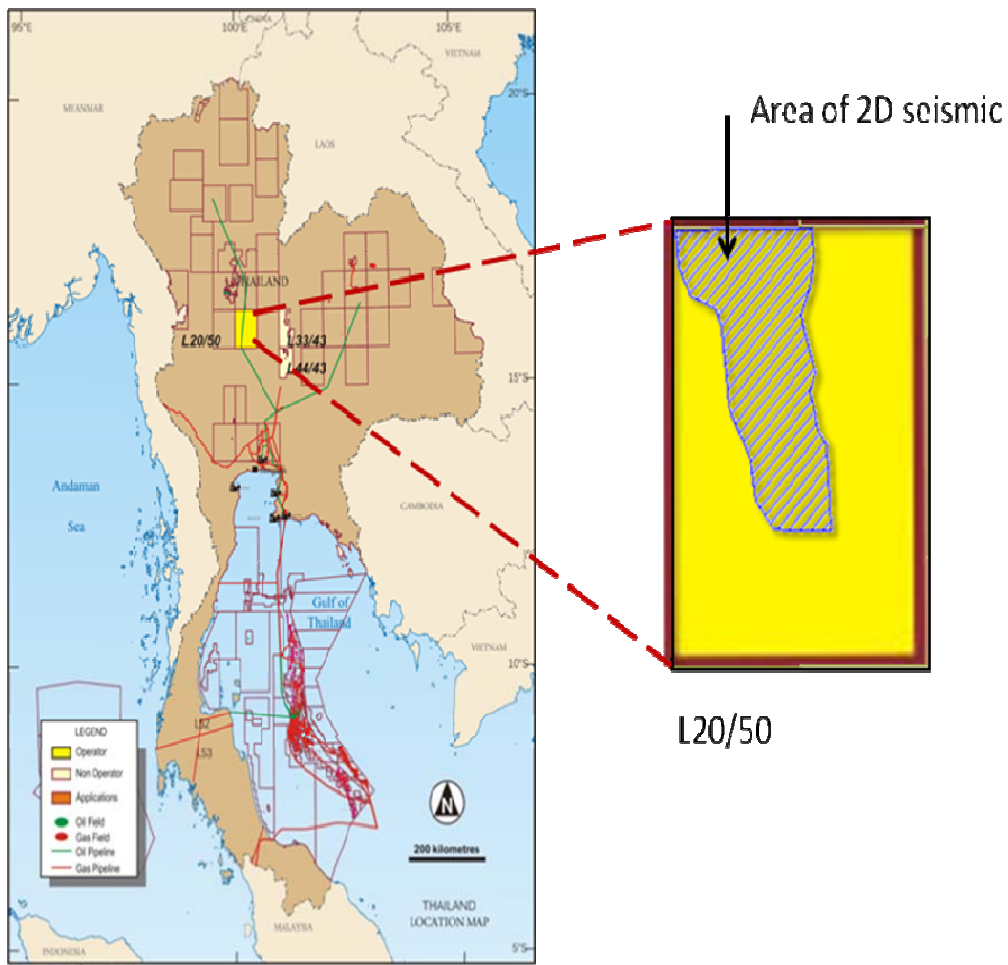

The large 2D seismic program will be followed by a drilling campaign of up to 4 wells, where Sun is targeting analogous structures to Carnarvon's Phetchabun Basin Oil Fields, with the potential for stacked fractured volcanic as well as classic sandstone plays.

L20/50 is located between Thailand's two largest producing onshore fields, being the next basin along from Carnarvon's Phetchabun Basin Oil Fields (~12,000 bopd) and due south and in the same basin as the prolific Sirikit Oil Field (>200 mmoeb reserves & ~20,000 bopd).

Yours sincerely  
**SUN RESOURCES NL**

A P Woods
