

## CLEANSING NOTICE UNDER SECTION 708A(5) OF THE CORPORATIONS ACT 2001 (CTH)

Prominence Energy Ltd (ASX: PRM) ("**PRM**" and "**Company**") advises that it has issued a total of 237,500,000 fully paid ordinary shares today following the conversion of performance rights granted as part of the consideration securities for the acquisition of Gawler Group Holdings Pty Ltd. These shares are subject to voluntary escrow period to 15 December 2026. The Company gives this Notice under section 708A(5)(e) of the Corporations Act 2001 (Cth) (Corporations Act) for this issue.

The Shares were issued without disclosure to investors under Part 6D.2 of the Corporations Act. As at the date of this Notice, the Company has complied with:

- the provisions of Chapter 2M of the Corporations Act as they apply to the Company; and
- section 674 and 674A of the Corporations Act.

The Company confirms that, as at the date of this notice, there is no information that:

1. has been excluded from a continuous disclosure notice given to ASX in accordance with the ASX Listing Rules; and
2. investors and their professional advisers would reasonably require for the purpose of making an informed assessment of:
  - (a) the assets and liabilities, financial position and performance, profits and losses and prospects of the Company; and
  - (b) the rights and liabilities attaching to fully paid ordinary shares,

to the extent to which it would be reasonable for investors and their professional advisers to expect to find such information in a disclosure document.

**Authorised for release by the Board of Prominence Energy Ltd**

### About Prominence Energy

Prominence Energy Ltd is an Australian Securities Exchange (ASX:PRM) listed energy company headquartered in Perth. PRM's investment strategy is to identify very high ROI (Return on Investment) opportunities, that can be secured at an early stage at close to 'ground floor' valuations. The experienced team at Prominence therefore reviews scores of opportunities before short listing a select few to actively pursue. In addition to conventional oil and gas projects, PRM will consider potential Helium, Green Energy and particularly Green Hydrogen investment opportunities. Current key opportunities include a 100% Working Interest in the Big Apple Prospect in the Gulf of Mexico, targeting a high potential and sizeable gas prospect, a 20% interest in Umine and a 10% interest in ECOSSAUS Ltd. ECOSSAUS has an early mover advantage in seeking to establish Australian solution-mined salt caverns, that can -be used for on demand energy reserves such as gas or hydrogen.

### About Natural Hydrogen

Natural hydrogen (also known as "white hydrogen" or "geologic hydrogen") is hydrogen that is formed from natural processes within the earth and accumulates underground. Naturally occurring accumulations of hydrogen are present all over the world and can be identified using conventional, low cost and non-invasive exploration methods. It can be produced and used as a renewable and non-polluting source of energy. When hydrogen is combusted (burnt) for energy, the only byproduct is water vapour, making natural hydrogen a true zero-carbon fuel. Natural hydrogen represents a hydrogen supply with the lowest production costs, environmental impact and life-cycle emissions when compared to manufactured forms of hydrogen.
